## Snyder's Crookedness in Early Case

To whom it may concern:

We, the undersigned jurors, respectfully state that we are members of the trial jury that tried Elbert Early on charge of shooting Ed Smith and while we are not interested in the Circuit Judges race our attention has been called to an instruction claimed by supporters of J. B. Snyder to have been given by Judge Rose in this case and we, in all fairness to all the parties, state that the instruction as copied in the Whitley County News, Mr. Snyder's paper, was not the instruction given in the case by Judge Rose. And we further state that we acquitted Early on the ground that J. B. Snyder, the Commonwealth's Attorney, failed to show Early committed the crime.

Signed:—

Acy Bolton, Foreman.

Ray Bird

This jury in the Early case exposes the Snyder falsehood. Shows Early was acquitted, not by reason of any instruction of Rose, but Snyder by his weak prosecution showed that Bryant, not Early, shot Smith.

The LaFollette Press, called Whitley News, cannot fool the people any longer.

### J. C. BIRD'S ANNOUNCEMENT PLEASES MANY

In this issue of the Record will be found the announcement of Hon. J. C. Bird, of Whitley County, as a candidate for Commonwealth's Attorney for this district.

Mr. Bird needs no introduction to the voters of McCreary County. Had it been left to the voters of this county he would have been on the Circuit Court bench now, as McCreary County gave him a large majority over his opponents for Circuit Judge four years ago.

Mr. Bird has been practicing law for several years, having graduated from the National University at Washington, D. C. in the class of 1901. He served Whitley County as County Attorney for four years with distinction. The people of this section have not forgotten the good work he did in this community and while he was County Attorney and while this was a part of Whitley County. It has been said of him by the older citizens here that he did more to suppress lawlessness in this neighborhood than any other man who ever served in a public capacity.

It is also to be remembered that the creation of McCreary County was due largely to his efforts and influence. It looked as if the bill creating the new county was going to be defeated in spite of all the combined efforts of its friends, when Mr. Bird, who was then County Attorney of Whitley County, was asked to go and he went to Frankfort and appeared before the committee which had the bill in charge and made a speech which won, not only the committee but a large number of other members of the Legislature, and as a result of this speech the bill was reported favorably and became a law the last day of the session. There were a score or more McCreary County men present on

this occasion who have always contended that the efforts of Mr. Bird saved the new county.

Taking all these things into consideration is it any wonder that the people of McCreary County feel exceedingly friendly toward him and if he is less popular in this county than when we voted for him four years ago we do not see any signs of it. In fact we believe the voters of McCreary County, both men and women, will come to his support again. We believe the people of McCreary County owe it to him to help elect that he may serve the county and prosecute in the Court House which possibly would not have been except for his efforts. We believe that McCreary County will give him a substantial majority on August the 6th.—McCreary County Record.—Pol. Adv.

### WITHDRAWAL

To my Friends in the 34th Judicial District:—

After two months of campaigning in this terrible heat I find myself broke down and the hardest part of the campaign yet to come. I am not physically unable to wage a winning fight. I must therefore withdraw from the race for Commonwealth's Attorney.

I shall be under everlasting obligations to those friends in the district who came to my support. I thank them from the bottom of my heart and release them from their pledges to me and hope some time to be able to repay them for their friendship to me.

I believe I could have won the fight if I were able to continue it. But I can't do that broke down.

Thanking my friends again, I am, Very truly,  
J. F. CATRON.

### THE COUNTY COURT CLERK'S RACE

There is more Americanism shown in this race than in any race for county offices. The laboring people, professional men and women white and black just come out boldly and bravely and say, "We are for Mrs. D. W. Shusher for County Court Clerk." I was in a community on the south side of the Cumberland River the other day and the people there say these two men are trying to take this lady's job. I would like for these two men to stop and think. Suppose one of them should die and leave his wife with a job that would enable her to work and keep her children together and some one would attempt to take it from her. If it was possible for them to know if they would almost think a robber was a credit to them.

Do you know what these two men say when the good people ask them what would become of the three orphan children if they take this mother's job from her? They have the impudence to stand up in a good woman's face and say, send them to the orphan's home. Think of these two hard hearted men. Ladies, they would say this about you and your children if you was in Mrs. Shusher's shoes. They would say, let your children go to the orphan's home and Mr. John Sear's children stay at home with their father and mother and let the three little Shusher children be sent off some 200 miles to grieve for their dead father sleeping in his grave in Flat Lick, Ky., and their mother somewhere at hard labor to make a living, and it a poor one.

People, do the right thing in this. Let John Sear and Henry Mills stay at their farms and keep their children with them and enjoy life and make money, and let the poor, pitiful women keep her job. These two men have two good farms. John Sear and Henry Mills, and they just want to take it because they think they can.

I don't believe Henry Mills would do this if it wasn't for others urging him to do it.

She is a believer in Union Labor and Union Labor will not stand for taking a job from a Mother. Be on the Lord's side and help this Mother to hold her job. The laboring people are all for her.

### DR. JOPLIN HERE

Dr. George A. Joplin, secretary of the Kentucky Sunday School Association, was here this week and spoke in the afternoon and evening on the supreme necessity of co-operative Sunday School work. There is room for all churches to work and the pity of it is that so little work is done in a field so large. Like Dr. Joplin we hesitate to give the figures of those who know nothing or practically nothing of Christianity in Kentucky. They are appalling. The speaker urged the prayers and co-operation of parents in making the work a success.

Mrs. J. L. Stanhill spent a couple of days in Middlesboro this week.

JORDAN THANKS HIS FRIENDS

My attention has been called to the numerous articles which have been appearing week by week in the columns of the Mountain Advocate, and I have carefully noted what our many good friends and neighbors have had to say in these articles in regard to my character as a man, my ability as a lawyer, and my chances to be in general and election to the office of County Attorney of Knox County. I joyfully appreciate the many many good things which they have had to say concerning my character, honesty, sobriety, and moral habits, as a citizen, and my ability as a lawyer, and I assure my friends that no one could be more grateful and thankful to them for their endorsement in this line.

I have always tried to live a measure up to the expectation which you have encouraged and set out in the columns of the Mountain Advocate concerning my life's history which stands as an open book for inspection to all and I ask my honorable opponents or anyone else to show any blot or stain on my character. I have tried to live that kind of life of which you speak in order to make life more worth living for the benefit of myself and others.

I have never and do not now feel myself above the least one in this world, and I promise the people of Knox County if elected I shall be the same Jordan in the future as in the past.

I have spent my time and money to qualify myself as a lawyer and I have it to the lawyers at the bar and the people who know me and have gone to school with me, whether or not I have applied for it. In this high position I have been a resident practicing attorney for nine years and I believe I have qualified myself also by experience. I have exceeded the requirements of the present Constitution of Kentucky for the 10th of Kentucky State, which says that one to be eligible to the office of County Attorney must have been a licensed practicing attorney for two years.

If I am nominated and elected to this important office I promise the people of Knox County a faithful, honest and efficient administration of the affairs of the office and I assure them I will look after the financial interests of the County, as the County Attorney should do, and that I will prosecute to the best of my ability those who should be prosecuted for violation of the criminal laws. But I do not believe in prosecution for the selfish desires of any one.

I submit my claims to the voters of Knox County believing that I can give to the people of this County the high character of service which is very much needed in this important office, and I assure them that I will not swap, trade, sell, or otherwise dispose of my friends and their interests in the County's welfare.

Respectfully,  
Pol. Adv. VICTOR A. JORDAN

### UNION COLLEGE SUMMER SCHOOL A SUCCESS

The Union College Summer School which opened up some weeks ago with thirty or forty pupils has been a pronounced success. Each teacher who takes this course is allowed a larger salary in consequence.

The same teachers, Dean G. M. Ryder, Prof. L. B. Peavy and Prof. Raymond Ryder, of Oklahoma City High School have been in charge of the hostess this week. The better the teachers of these courses, the better the teachers of the County and we congratulate the College on its choice of teachers.

Charles Owens left last week for Iowa where he will join a Chantiqua and go on a circuit as clarinet and saxophone soloist.

### FRED SMITH KILLED NEAR APPALACHIA, VA.

Fred Smith, son of Bill Smith of Artom, who is well known as a meat vendor thru this section, was killed at Appalachia, Va., Sunday while in a fight with another man. The fight was one of fists, a thing somewhat rare in those sections of the Mountains, and Fred had his antagonist down, when it is alleged that a man named Thompson pulled an automatic and shot Fred three times thru the hip, the bullets entering the body and killing him. No further particulars have been obtained.

### BILLY SUNDAY IN CORBIN

It is expected that the Billy Sunday party in the private car of Mr. Mapother, president of the L. & N., will arrive in Corbin about 5 p.m. and remain about two hours. The meeting will be held in the open air. From Corbin Mr. Sunday and his party will go on to Whiting, La., Ind., for the Annual Bible Conference.

### KING NEWS (From Last Week)

Everybody is busy picking berries and looking for corn.

W. B. Vaughn lost a fine Jersey cow last week. The report is that she was looked to death.

Bertie Martin of Swan Lake, has been visiting at Prichard Branch for a few days.

Sunday School at Logan Gap is progressing nicely.

Last week, June 20 to 25, was Junior Week at Lexington. At this meeting club members and leaders from about forty counties met and camped for the week on the University grounds. It sure was a nice week and an instructive week and was enjoyed by all who attended. Nevada Elliott, Ora Shelton, Bill Lundy and W. P. Elliott were Knox County representatives at this meeting.

Everyone in this neighborhood is very much grieved over the death of E. A. Ferguson, from a gun shot wound. James Reese Lewallen is said to have been the one who did the shooting, but the particulars are not generally known. It is reported that Lewallen was drinking.

July 15 to 25 will be Junior Club Camp at Barbourville. At this camp the club members from Clay, Harlan, Bell and Knox will meet and be instructed by some of the best teachers in the State on club work, scientific farming and domestic science. Every club boy and girl should plan to attend this camp. It will be practically free. Each member will bring his own grub and bed gear and pay 50 cents for the week to pay the cook.

### W. C. E.

Mrs. G. M. Richards and Mrs. Gibb Lusk attended the Billy Sunday meeting in Norton last Sunday. Everything has been so well thought out that the large numbers in attendance are all comfortably looked after and the hotels have plenty of room accommodations.

You'll find it in the Advocate.

### THIRD STILL BAGGED

Sheriff B. P. Walker and four deputies, J. F. Dozier, W. M. Johnson, Murph Cannon and R. E. Burnett, took another still Wednesday, this one being on the George Miller place on Fighting Creek.

The moonshiners had dug a hole in the bottom land for their water supply. The still was warm showing it had been recently operated but the whiskey was gone. The worm also was missing.

No arrests have yet been made.

### GONE BUT NOT FORGOTTEN

Whereas it has pleased God in His wisdom to take from among us our dearly beloved Sister, Hattie Pryce, Be It Resolved: The Rockhold B. Y. P. U. has lost one of its best and most faithful members.

The Church in its many branches of work, a faithful and devoted member.

The beautiful smile which came from her soul so pure could not be erased even in the agony of death.

Upon the sunny banks of sweet remembrance we hope to see that sweet smile again.

## TOMATO PLANTS DEMAND WARMTH

Early Ripening Can Be Secured  
In Most Sections Only by  
Starting Indoors.

### KEEP MODERATELY WATERED

Just Such Soil as Will Grow Crop of  
Corn or Potatoes Is Recommended—Little Well-Rotted  
Manure Will Help.

(Prepared by the United States Department of Agriculture.)

There is perhaps no product of the garden that is so refreshing and palatable as well-ripened, fresh tomatoes, and they can be used in such a variety of ways. While fresh tomatoes are preferable to canned ones they lose very little flavor or quality in the canning and good canned tomatoes add very materially to the food supply of the winter months.

To Get Early Tomatoes.  
Early ripening plants are ready to the value of the tomato crop early to maturity.

Hardy Tomato Plant Started in Pot.

tions only by starting the plants indoors. Garden specialists of the United States Department of Agriculture say it is easy to grow plants indoors by sowing a small packet of tomato seed in a clear box filled with mellow soil about six or eight weeks before the usual time of the last killing frost in spring. The seeds should be covered about one-quarter inch and the soil kept moderately watered and the plants will generally come up in less than a week after planting the seeds. Keep the box near a window where it will get plenty of sunlight, and turn it around each day to make the plants grow straight.

When the plants begin to crowd each other, which will be in about 15 days after they come up, secure a large, flat box, say three inches deep and just large enough to fit into the window, fill it with rich, sifted soil and transplant, giving each plant about two inches of space. With proper care to turn the box from time to time and also to keep the soil moderately watered the plants will be about four inches high, strong and stocky when the weather has warmed enough to make it safe to set them in the garden.

Warmth Is Required.  
Tomatoes naturally grow in a warm climate and require plenty of warmth from the start. The plants should be kept at about a living-room temperature until a few days before they are to be set in the garden; then they should be gradually exposed to outdoor conditions to harden them. After they are set in the garden it may be necessary to cover them for a few nights with several thicknesses of newspaper to protect them from the cold.

Tomatoes require a moderately rich soil, not too rich, but just such soil as will grow a good crop of corn or potatoes. A little well-rotted manure can be worked into the spot where each plant is to be set and a tablespoonful of high-grade fertilizer sprinkled over a space about one foot in diameter and mixed with the soil will aid in giving the plant a good start. Planting distances will depend upon whether the plants are to be pruned to a single stem and trained to stakes or are to be allowed to grow according to their natural habit of spreading over the ground. If the plants are to be trained they may be set in rows as close as three feet and spaced 18 inches in the row. If they are not to be trained the plants should be set three to four feet apart in each direction.

### CATER TO MARKET DEMANDS

Shipment of Unsatisfactory Stock by  
Growers Seriously Affects  
Prices Offered.

Shippers of potatoes would profit by heeding market demands and preferences, say specialists of the bureau of markets, United States Department of Agriculture. Dealers and consumers, they find, do not desire badly cut, mottled, frost-bitten, or decayed potatoes, or those damaged by sunburn, blight, dry rot, or an excess of seeds or second growth. Markets frequently are overloaded, it is said, prices seriously affected, and unnecessary losses suffered by growers because of the shipment of such unsatisfactory stock.

## Daddy's Evening Fairy Tale

MRS. WOOD ELF.

"I'll have some hot broth directly," said Mrs. Wood Elf to the boy and girl who were not answering. "The fire is all out," she went on, "and I only need to strike a match to light it."

She went off a little distance to light the fire, which was in the heart of the woods, but in a place where the trees were very close and where the branches of the pines would not be reached by the flames. The fire went out.

## A TIP TO OUR FOLKS

It is hard work to get folks in most communities to pass the news along to the editor of the home paper. S. A. Mellen, of the Plymouth, Wis., Reporter, tried an unusual stunt the other day to stimulate "contributions." Here it is:

HAS ANY ONE  
Died ..... Had a fire ..... Eloped  
Had a baby ..... Divorced ..... Had  
a party ..... Left town ..... Sold  
a farm ..... Embezzled ..... Been  
arrested ..... Come to town ..... Had  
twins ..... Or colic ..... Sold a  
cow or lost an auto ..... Stolen a  
dog ..... or his friend's wife .....  
Committed suicide ..... or murder  
Fallen from an airplane ..... Fallen  
into the well ..... Fallen into a leg-  
acy?

Well, then,  
THAT'S NEWS  
So phone it in or mail to

R. H. Newitt has some dandy second hand pipe that is already adapted to the use of those who have gardens on the hill side with a well or spring above. By use of a tank and gasoline engine quite a big patch of ground may be irrigated and more money made on the smaller patch than on a piece of ground several times larger.

## CARDUI HELPED REGAIN STRENGTH

**Alabama Lady Was Sick For Three Years, Suffering Pain, Nerves and Depressed—Read Her Own Story of Recovery.**

**Pain Rock, Ala.**—Mrs. C. M. Stegall, of near here, recently related the following interesting account of her recovery: "I was in a weakened condition. I was sick three years in bed, suffering a great deal of pain, weak, nervous, depressed. I was so weak, I couldn't walk across the floor; just had to lay and my little ones do the work. I was almost dead. I tried everything I heard of, and a number of doctors. Still I didn't get any relief. I couldn't eat, and slept poorly. I believe if I hadn't heard of and taken Cardui I would have died. I bought six bottles, after a neighbor told me what it did for her.

"I began to eat and sleep, began to gain my strength and am now well and strong. I haven't had any trouble since... I sure can testify to the good that Cardui did me. I don't think there is a better tonic made and I believe it saved my life."

For over 40 years, thousands of women have used Cardui successfully, in the treatment of many womanly ailments.

If you suffer as these women did, take Cardui. It may help you, too. At all druggists. E 85

Mr. and Mrs. L. T. Bomer, of Manchester, were here this week on a visit to their son, Fred Bomer, of the Cut Rate Drug Store and their daughter, Mrs. J. H. Black, who was operated on at the Logan Sanitarium Saturday and who is doing nicely.

William Jackson has repaired and painted his home on Knox Street.

## A SERIOUS MATTER—POLICES CANCELLED IN KNOX COUNTY

One of the prominent citizens of Barbourville was surprised to learn on trying to re-new his accident and health policy which he had carried for three years that the company is refusing business in Knox County and is cancelling policies written here as they apparently consider our business to be of too hazardous a nature. A number of our people are insured with this same company. This is a reflection on Knox County which will scarcely be relished.

## SPINACH IS ADAPTED FOR EVERY LOCALITY

Plant Requires Rich Soil and Stands Cold Well.

Good Seed Should Be Spaded and Quantity of Well-Rotted Manure Worked In—It Is Best for Use While Young and Tender.

(Prepared by the United States Department of Agriculture.)

Well-grown spinach is one of the best early spring and late fall greens that can be raised in the garden. Spinach is adapted for growing in practically every locality, requires a rich soil, stands cold as well or better than does lettuce, but does not do well during the hot part of the summer. United States Department of Agriculture Gardeners' specialists suggest one or two plantings in the early spring, just as soon as the danger of severe frost is past, and a planting late in the summer for fall use. Throughout the

Splendid Patch of Spinach.

South spinach can be planted in October and remain in the open ground all winter.

For growing spinach in the home garden a bed about 3 feet in width and 25 or 30 feet in length should be spaded and a quantity of well-rotted manure worked into the top 8 inches of soil. Three pounds of commercial fertilizer should also be scattered over the surface and well worked into the soil. Six or eight ounces of seed will be sufficient for this space. Sow in little drills or furrows running lengthwise of the bed, the rows to be about 6 or 7 inches apart. The seed should be covered ½ inch deep and the soil slightly firmed over it. Watering may be necessary if the weather should be extremely dry following the planting of the spinach seed.

Spinach grows quickly and requires very little cultivation, except to loosen the soil a trifle between the rows and keep weeds from getting a start. If the plants are too thick—that is, crowd each other—they can be thinned out and those removed in thinning cooked for greens. The plants left will then have room to grow larger. Spinach is very desirable as an early spring green, as it contains plenty of iron and other mineral matter. It should always be used while young and tender.

## QUALITIES OF FARM FENCES

To Give Satisfaction Barrier Must Be Made to Turn All Stock Without Injuring Them.

Farm fences should combine two qualities—service and economy—says the United States Department of Agriculture. To give satisfactory service the fence must be constructed so as to turn all kinds of stock without injuring them. To be economical it must be built as cheaply as is consistent with durability. The fence that is erected at a low initial cost is not necessarily economical, for it may be so short that it will be very expensive in the end.

The cost of maintaining a farm fence is determined by such factors as interest, repairs, and depreciation on the fence itself, interest on the value of land rendered unusable, and the expense of keeping down weeds. The cost of repairs and the annual depreciation depend largely on the construction. If a fence is made of a cheap grade of material and is cheaply constructed it will need frequent repair and will be short lived. Such a fence will have a high repair and depreciation charge, which in most cases will more than counter-balance the increased investment cost that the erection of a more substantial fence would require. If a fence is made of good materials and is properly built, its repair and depreciation charges should be very low.

The efficiency of a fence depends upon the quality of wire and posts used and upon the manner of construction.

## LIME CORRECTS SOUR SOILS

Application Will Prove Beneficial to Small Garden Plot—Binds Loose, Sandy Loams.

An application of about 150 pounds of hydrated or air-slaked lime to a garden plot 30 by 60 feet in size will often prove beneficial. Lime has the effect of loosening and pulverizing any heavy clay soil and, of binding loose, sandy soil. Lime also corrects sourness in the soil, which is often due to lack of drainage, but in a case of this kind drainage should be secured.
